PROFESSIONAL SUMMARY

Java Full-Stack Developer and **Integrated B. Tech M. Tech Computer Science Engineering** student (Gautam Buddha University) with hands-on experience building scalable web applications using **Java**, **Spring Boot**, **React.js**, **Node.js**, and **MySQL/PostgreSQL**. Strong foundation in object-oriented programming (**OOPs**), data structures and algorithms (**DSA**), and **RESTful API** design, with direct contributions to a production college website used by real students and staff. Oracle Certified Generative AI Professional with practical experience in prompt engineering, **LangChain**, retrieval-augmented generation (**RAG**), vector databases, **LLM** fine-tuning, and multi-agent AI systems. Comfortable across the full SDLC in Agile teams, from database design through deployment on Netlify and Vercel.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+)

Frontend: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS, jQuery, Responsive Design, SEO Fundamentals

Backend & APIs: Spring Framework, Spring Boot, Spring MVC, Spring Security, Hibernate (ORM), RESTful APIs, Node.js, Socket.IO

Databases: MySQL, PostgreSQL, MongoDB, JDBC

AI / Generative AI: Prompt Engineering, LangChain, Retrieval-Augmented Generation (RAG), Vector Search (ChromaDB, FAISS), LLM Fine-Tuning (LoRA/QLoRA), Multi-Agent Systems, Hugging Face Transformers, OpenAI API

Tools & DevOps: Git, GitHub, VS Code, IntelliJ IDEA, Eclipse, Spring Tool Suite, Maven, Postman, Netlify, Vercel

Core CS Concepts: OOP, Data Structures & Algorithms (DSA), SDLC, Agile Methodology, Clean Code Principles, System Design Fundamentals

PROJECTS

Enterprise Knowledge Assistant (RAG System)

LangChain, ChromaDB, Python

- Built a retrieval-augmented generation pipeline over enterprise documents, combining semantic search and vector embeddings to return grounded, citation-backed answers.
- Designed the query → embed → retrieve → generate workflow and tuned chunking/retrieval parameters to improve answer relevance.

Multimodal Customer Support Agent

LangChain, Gradio, Tool Calling / Function Calling

- Developed an AI support agent that handles text and image-based queries and automates common resolution workflows using tool-calling.
- Integrated multi-step reasoning and function calls to connect the LLM to external actions and data sources.

Autonomous Multi-Agent Business Assistant (Capstone)

Multi-Agent Systems, Fine-Tuning (LoRA/QLoRA), FastAPI

- Designed an orchestrated multi-agent system with specialized agents, tool-based reasoning, and dynamic task routing for business workflows.
- Applied LoRA/QLoRA fine-tuning techniques to adapt an open-source LLM for task-specific performance.

College Website Development System

React.js, Node.js, PostgreSQL, Tailwind CSS | Jan 2026 – Apr 2026

Live: web.onlinegbu.com

- Contributed to a full-stack, production-grade college website with dynamic content management for news, events, notices, and department pages.
- Built backend RESTful APIs and CRUD-based, database-driven modules using Node.js and PostgreSQL.
- Collaborated with a development team using Git-based workflows, maintaining code quality and on-time feature delivery.

Real-Time Chat Application

Node.js, Socket.IO, HTML5, CSS3, JavaScript | Jun 2025 – Aug 2025

- Built a fully responsive real-time chat frontend using Socket.IO for low-latency, bidirectional communication.
- Implemented clean UI/UX patterns with cross-browser compatible layouts for a consistent experience across devices.

Weather Application

React.js, Bootstrap, OpenWeather API | Jun 2025

- Developed a React-based weather app integrating the OpenWeather API with city search and a fully responsive UI.
- Applied React hooks and component architecture best practices for efficient state management.

EDUCATION

- Integrated B. Tech & M. Tech, Computer Science & Engineering – Gautam Buddha University
- Senior Secondary (Class 12) – CBSE
- Secondary (Class 10) – CBSE
